

1. Cut out ears along solid lines. Set aside.
2. Cut out face along outer solid line.
3. Cut out eye holes along solid lines.
4. Cut slits along the six smaller lines near the mouth, eyes, and forehead.
5. Bring the the slits together near the mouth and eyes, and secure with tape or glue. (This is to give the mask more shape).
6. To finish each ear, roll the bottom left and right sides together to form a small tube, and secure with tape or glue. Insert ears into slits that were cut into the forehead of the mask, and secure with tape or glue.
